

STAIR TREAD TOOL

- Helps user measure and cut tread for faster stair installation
- Used to measure and maintain uniform risers
- Strengthened top crossmember delivers a higher clamping force for enhanced stability when moving the tool
- High quality knobs with brass inserts provide increased durability and strength, outlasting the competitor
- Recessed spring pocket keeps springs from protruding past top crossmember
- Dimensionally accurate ruler provides precise measurements from 12" (305 mm) down to 1/8" increments
- Patent Pending

Clear, bold markings extend onto beveled edge for easy readability

Accommodates a standard 2" x 4" or smaller
